REPORT ON MANAGEMENT DISCUSSION AND ANALYSIS

The company is engaged in the business of manufacturing and trade of Indian Made Foreign Liquor (IMFL) under our own brand portfolio as well as under tie up arrangements with other companies. The IMFL comprises of whisky, Brandy, Rum, Gin & Vodka. We started our initial capacity of 7,20,000 cases per annum and a bond capacity 6300 cases of Excise Bonded warehouse. Presently our plant is having an installed capacity of 14,25,000 cases per annum and 26000 cases of Excise Bonded warehouse.

During the year, the total Income from operations was Rs. 5232.00 lakhs compared to Rs 4576 lakhs in the previous year recording a loss of Rs. 547 lakhs. The net loss was Rs. 547 lakhs as against the Loss of Rs. 590 lakhs in the previous year.

Business Outlook

Indian alcohol market has been flourishing since 2001 and registered growth between 7-12% till 2011 when the growth finally declined due to heavy import taxes, state government taxes, excise duty and political instability in election season. The year 2013 was a great fall in Indian alcohol market when the spirits volume actually declined by 2-3% in India. Alcohol industry is a part of huge US\$ 12 billion beverage industry of India excluding milk and milk products.

Indian alcohol market is dominated by whisky which falls under spirit category. However, the wine market is expected to show highest growth in the forecast period. The Indian alcohol market is broadly segmented as spirits, beer and wine. Spirits are further sub-segmented into whisky, rum, brandy, vodka, gin and others.

Consumers are largely inclined towards quality alcohol due to increasing disposable income and better standard of living. Other drivers include greater inclination towards social drinking as well as women indulging into alcohol consumption. As India has huge youth population, the demand of alcohol would remain high in the coming years. The market saw a boom in Vodka sales in past decade as Vodka was positioned as the alcohol for women. Youth largely prefer beer and the salaried youth are inclined toward whisky and rum. In beer segment, more than 85% of the market is dominated by strong beer rather than mild.

There exists quite a few restraints in the market such as high taxes, stringent government regulations on manufacturing and selling liquor, and ban on advertisements among others. Alcohol consumption is also subjected to the overall economy's growth in terms of gross net income per capita and household expenditure. Thus, development in the economy would give a thrust to the alcohol market further but in a less pronounced manner.

One of the most notable trend is the demand of premium liquor among the consumers. The growth of premium segment would surpass the overall growth of alcohol market due to greater exposure towards foreign brands. India has seen a burst of high net worth individuals in past two decades and the list is ever increasing, which would fuel the growth of market in premium segment. In addition to travel retail theatres and duty free retailing would further boost the growth of premium alcohol in the market.

Risk Factors:

Government regulations affects the Indian Liquor industry introducing structural rigidities. Apart from the high level taxes and levies regulations pertaining to licensing creation or expanding of brewing / distillery and bottling capacities, manufacturing process (grain based and molasses based), distribution and advertising impinge on the industry. Further liquor being a state subject, every state has different regulations (including those on distribution) and tax rate for the industry apart from restrictions as well as levies on the inter- state movement of liquor.

Future Outlook:

During current year, your Company will try to increase the sales in our existing plant at Pondicherry.

“Annexure B” to the Independent Auditors’ Report

Referred to in paragraph 10(f) of the Independent Auditors’ Report of even date to the members of Ravi Kumar Distilleries Limited on the financial statements for the year ended March 31, 2016

1. Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act

We have audited the internal financial controls over financial reporting of Ravi Kumar Distilleries Limited (“the Company”) as of March 31, 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

2. Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

3. Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

6. Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

7. Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

8. Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the Internal Control over Financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO FINANCIAL STATEMENTS :

1. General Information :

The Company was incorporated during the year 1993 and is engaged in the business of manufacture and sale of Indian Manufactured Foreign Liquor (IMFL). The Company has its manufacturing unit at Pondicherry.

2. Significant Accounting Policies :

2.1 Basis of preparation of Financial Statements :

The Financial Statements have been prepared in accordance with the generally accepted accounting principles ('GAAP') applicable in India under the historical cost convention on accrual basis. These financial statements have been prepared to comply in all material aspects with the accounting standards notified under Section 133 read with Rule 7 of the Companies (Accounts) Rules, 2014, as amended from time to time and the other relevant provisions of the Companies Act, 2013.

All Assets and Liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III of the Companies Act, 2013.

2.2 Use of Estimates :

The preparation of Financial Statements in conformity with GAAP requires that the management of the Company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, the reported balances of assets and liabilities and the disclosures relating to contingent liabilities as of the date of the financial statements. Actual results could differ from these estimates. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized. Management believes that the estimates used in preparation of financial statements are prudent and reasonable.

2.3 Tangible Assets :

Tangible Assets are stated at cost (or revalued amount as the case may be) less accumulated depreciation and accumulated impairment losses if any. Cost comprises purchase price and any other attributable cost of bringing the asset to its working condition for its intended use. Subsequent expenditure related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Gain or loss arising from de-recognition of assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognized in the statement of profit and loss when the asset is derecognized.

2.4 Borrowing Costs :

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that takes necessarily substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

2.5 Impairment of assets :

As on Balance Sheet date, the Company reviews the carrying amount of Fixed Assets to determine whether there are any indications that those assets have suffered "Impairment Loss". Impairment loss, if any, is provided to the extent, the carrying amount of assets exceeds their recoverable amount. Recoverable amount is higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from continuing use of an asset and from its disposal at the end of its useful life.

2.6 Investments :

Investments that are readily realizable and intended to be held for not more than a year are classified as "Current Investments". All other Investments are classified as Long Term Investments.

Current Investments are carried at lower of cost or Market / Fair Value determined on a individual investment basis.

Long Term investments are valued at cost. Provision for diminution in the value of long term investment is made only if such decline is other than temporary in nature.

2.7 Grants and Subsidies :

Grants and Subsidies are recognized when there is reasonable assurance that the Grant / Subsidy will be received and all attaching conditions will be complied with. When the grant or subsidy relates to a revenue item it is recognized as income over the period necessary to match them on a systematic basis to the costs, which it is intended to compensate.

Where the Grant on subsidy relates to an asset its value is deducted in arriving at the carrying amount of the related asset.

2.8 Revenue Recognition :

The company is in the business of manufacture and sale of IMFL products. Sale of goods are recognized when the goods are dispatched / on passing title of the Goods to the customers. The sales are accounted by including the scheme / discounts / Excise Duty and Sales Tax. The Scheme discounts / Sales Tax are charged off separately to the Profit and Loss Account. Profit on sale of investments is recorded on transfer of title from the company and is determined as the difference between the sale price and the carrying value of the investment. Interest is recognized based on time-proportion method based on rates implicit in the transaction.

2.9 Inventories :

Inventories are valued at lower of cost and estimated net realizable value after providing for cost of obsolescence and other anticipated losses, wherever considered necessary. Cost includes taxes, duties and all incidental expenses directly attributable to the purchases.

Method of assignment of cost is as under:

Raw Material, Stores & Spares : Weighted average cost basis

Work – in – progress : Direct expenses plus appropriate Factory overheads on the basis of completed production

Finished Goods : Cost of goods, direct expenses plus appropriate Factory overheads and Excise Duty

Traded Goods : Actual cost Basis

2.10 Employee Benefits :

The Provident fund scheme and Employee State Insurance Scheme are defined contribution plans. The company contributes a fixed sum to the Provident Fund / Employees State Insurance Scheme maintained by the Central Government. The contribution paid / payable under the schemes is recognized during the period in which the employee renders the related service.

The liability for Gratuity to employees as at the Balance Sheet date is as per the obligation to gratuity fund administered by the trustees and managed by Life Insurance Corporation of India. The contribution thereof paid / payable for the relevant period is charged off to Profit and Loss Account.

2.11 Foreign Exchange Transactions :

Foreign currency transactions are recorded at the rate of exchange prevailing on the date of the respective transactions.

Foreign Exchange monetary items in the Balance Sheet are translated at the year-end rates. Exchange differences on settlement / conversion are adjusted to Profit and Loss Account.

2.12 Tax Expenses :

Tax expenses for the year comprise of current tax and deferred tax. Current tax is measured after taking into consideration the deductions and exemptions admissible under the provision of Income Tax Act, 1961 and in accordance with Accounting Standard 22 on "Accounting for Taxes on Income".

Deferred Tax represents the tax effect of timing differences between taxable income and accounting income for the reporting period and is capable of reversal in one or more subsequent periods. Deferred tax are quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet Date.

Deferred Tax Assets are recognized and carried forward only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax asset on unabsorbed depreciation and carry forward of losses are not recognized unless there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

2.13 Contingent Liabilities and Provisions :

Provisions are recognized only when there is a present obligation as a result of past events and when a reliable estimate of the amount of obligation can be made.

Contingent Liability is disclosed for

- a. Possible obligation which will be confirmed only by future events not wholly within the control of the company or
- b. Present obligations arising from the past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.
- c. Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

2.14 Earnings Per Share :

In determining the Earnings Per share, the company considers the net profit after tax including any post tax effect of any extraordinary / exceptional item. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period.

The number of shares used in computing Diluted earnings per share comprises the weighted average number of shares considered for computing Basic Earnings per share and also the weighted number of equity shares that would have been issued on conversion of all potentially dilutive shares.

In the event of issue of bonus shares, or share split the number of equity shares outstanding is increased without an increase in the resources. The number of Equity shares outstanding before the event is adjusted for the proportionate change in the number of equity shares outstanding as if the event had occurred at the beginning of the earliest period reported.

2.15 Leases :**Finance Lease**

Leases which effectively transfer to the company all the risks and benefits incidental to ownership of the leased item, are classified as Finance Lease. Lease rentals are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between the finance charges and reduction of the lease liability based on the implicit rate of return.

Operating Lease

Lease where the lessor effectively retains substantially all risks and benefits of the asset are classified as Operating lease. Operating lease payments are recognized as an expense in the Profit & Loss account on a Straight Line Basis over the Lease term.

2.16 Segment Reporting :

The generally accepted accounting principles used in the preparation of the financial statements are applied to record revenue and expenditure in individual segments.

Segment revenue and segment results include transfers between business segments. Such transfers are accounted for at the agreed transaction value and such transfers are eliminated in the consolidation of the segments.

Expenses that are directly identifiable to segments are considered for determining the segment result. Expenses, which relate to the company as a whole and are not allocable to segments are included under unallocated corporate expenses.

Segment assets and liabilities include those directly identifiable with the respective segments. Unallocated corporate assets and liabilities represent the assets and liabilities that relate to the company as a whole and not allocable to any segment.
